DataComm PLUS

ABOUT DATACOMM PLUS

Since 1981, DataComm Plus has been providing businesses of all sizes the tools they need to communicate with the world. Based out of Southeastern Wisconsin, we help your company grow and succeed by finding the true solution for your telecommunication and IT needs.

DATACENTERS

Our main datacenter is in Milwaukee, WI (MKE1). It is a secure and redundant facility with multiple bandwidth providers ensuring the fastest possible connection speeds for all our customers around the world. We also maintain a second datacenter in Phoenix, Arizona (PHX1).

OUR SERVICES

HOSTED PHONE SYSTEMS

We offer multiple phone system platforms to choose from to ensure all of your needs are met. Hosting your phone system in one of our secure datacenters allows for flexibility, redundancy and remote ability that was never possible with an on-premise phone system. Unmanaged or managed options available.

ON-PREMISE PHONE SYSTEMS

Prefer your phone system onsite at your office? No problem, we offer similiar hosting solutions that can be hosted at your office on your server hardware or an appliance provided by Datacomm.
SIP TRUNKING

Do you have an existing phone system that you are still under contract with or a legacy phone system that you are not ready to replace? Not an issue, we can still convert your PRI or analog lines to SIP service and save you money every month until you are ready to migrate to a hosted phone system.

IT CONSULTING SERVICES

With our certified Cisco, Windows, Linux and Mac engineers we can be your one stop provider for all of your IT & Networking needs. Whether you need onsite or remote assistance, our engineers are ready to solve your IT related issues.

VPS & DEDICATED SERVERS

Hosted from our two datacenters, we also rent server space where you can host your application(s) in a secure and redundant facility. No longer do you need to worry about your office Internet connection going down.

WEBSITE & EMAIL HOSTING

No matter who designed your website or where it is currently hosted, we have a hosting package that is right for you. We also offer domain name registrations and renewals along with SSL's to keep your website secure.

OFFSITE BACKUP

Our backup system for Windows workstations and servers is extremely reliable using incremental backups for individual files. You also have the ability to create multiple local and cloud backups with full system and bare metal backups.

SPAM & VIRUS FILTERING

Add another layer of protection to protecting your email accounts. No software to install, fully rendundant, web based administration and it just works by default. Filtering rules are updated 24 x 7 x 365.

COLOCATION

Ready to move your servers out of your office to a secure and redundant facility where you never have to worry about power or Internet issues again? Whether you have one server or several cabinets full, we are ready to help you today.
